

Luckey Formerly Utilized Sites Remedial Action Program Site News from the Corps
Sent Fri 10/9/2020 11:53 AM

Hello from the U.S. Army Corps of Engineers Buffalo District:

Beginning on Monday, October 12, 2020, scheduled road work will begin on State Route 582. The Corps will be using a pre-determined alternate route for shipments to the disposal facility and to receive truckloads of soil for backfill for our cleanup of the Luckey Formerly Utilized Sites Remedial Action Program Site. The alternate route was coordinated with local officials, and will have trucks going east on State Route 582 through the Village of Luckey for about a month.

We continue to make progress with the cleanup of the site. As of October 2, 2020, the Corps of Engineers has excavated and disposed of 94,904 tons of FUSRAP-contaminated material from the site. Cleanup of the site is 44% complete, and the Phase 2 excavation area is 70% percent complete. The Corps continues to backfill the Phase 1 Lagoon B Area.

Our highest priority during cleanup activities at the Luckey Site is to be protective of human health and the environment, ensure that work is conducted in a safe and efficient manner, and prevent the spread of contamination. We are also actively monitoring the evolving COVID-19 situation and are in regular communication with our personnel and contractors to emphasize the importance of taking appropriate actions -- such as social distancing, wearing appropriate protective equipment, temperature screening of individuals before entry into the site, and personal hygiene measures -- to safeguard employee health and welfare while working during the pandemic.

For additional information about the site, please visit <https://www.lrb.usace.army.mil/Missions/HTRW/FUSRAP/Luckey-Site/> on the Buffalo District website. If you know someone that is interested in receiving News from the Corps updates about our progress at the site, please ask them to email fusrap@usace.army.mil to let us know.
