

Niagara Falls Storage Site News from the Corps

Sent Tue 12/13/2016 9:14 AM

Hello from the U.S. Army Corps of Engineers, Buffalo District:

The 2015 Niagara Falls Storage Site (NFSS) Environmental Surveillance Technical Memorandum is available at:

<http://www.lrb.usace.army.mil/Missions/HTRW/FUSRAP/NiagaraFallsStorageSite.aspx>
in the Environmental Monitoring section.

The district conducts an environmental surveillance program at the site in support of our Formerly Utilized Sites Remedial Action Program mission to protect human health and the environment. The environmental surveillance program quantifies and evaluates radiological, chemical, and water quality data from the environment at the NFSS. Results of this program are published annually in the form of a technical memorandum.

The 2015 technical memorandum indicates that the findings are consistent with the findings of prior year evaluations, demonstrating that site controls are continuing to perform as designed and the site is fully protective of human health and the environment.
