Subject: Re: FUSRAP Seaway- Tech Memo (TM) regarding last Summerstesting

Hi [REDACTED],

In case [REDACTED] & [REDACTED] haven't gotten back to you, yes, we will follow DEC's lead on this. Thanks

[REDACTED]

Summerstesting

Subject: FUSRAP Seaway- Tech Memo™ regarding last

[REDACTED]

I have not heard from you with regards to your review of the Technical Memo. Is your response tied to the below?

[REDACTED] - While some of us have read the reports, we have not been able to finish our review, due to other projects. In particular, we have not had time to carefully review the conclusions.

In view of the fact that the Corps intends no further action on this site in this fiscal year, we cannot justify giving these a high priority at this time. If you have to close out the contract, we can

SEA_0587

understand that and are willing to consider these final Corps documents, as long as there is no assumption or implication that DEC has reviewed or concurs with the conclusions of the reports. We will send you our comments within the next two months. To expedite our review, it would be helpful to have a technical meeting with all involved parties, to discuss the data and conclusions.
