PROJECT DESCRIPTION AND BACKGROUND:

- The projects use of dredged material from new or existing Federal projects to protect, restore, or create aquatic and ecologically related habitats, including wetlands; to reduce storm damage to property, in connection with dredging for construction, operation, or maintenance of an authorized navigation project. This project will create 16.5 acres of submerged aquatic habitat.
- The creation of aquatic habitat using anchored logs and log tangles will increase the density and diversity of aquatic species

BUDGET INFORMATION:

Authorized Total Project Cost	\$14,840,000
Non-Federal Sponsor Cost	\$4,840,000
Federal Cost	\$10,000,000

CURRENT STATUS:

Last year a few small recreational boats were damaged after they went into the project footprint. The PDT is working to develop permanent safety solutions, so vessels will be able to more clearly identify the project site.

The team is working with the dredging program to coordinate efforts for the FY23 dredging cycle. Once placed, the team will evaluate the sediment and continue working on a vegetation plan.
