

**JOSLYN MANUFACTURING SITE – FORT WAYNE, IN**  
Formerly Utilized Sites Remedial Action Program (FUSRAP)

**Location**

- 2400 Taylor Street, Fort Wayne, IN.

**Site History and Project Description**

- The Joslyn Manufacturing and Supply Co. (Joslyn Manufacturing Site), officially known as the Fort Wayne Steel Corporation, is owned by Valbruna Slater Stainless Inc.
- During the Nation's early atomic energy program, the Atomic Energy Commission, the Manhattan Engineer District, and the University of Chicago contracted with the Joslyn Manufacturing Site to help develop America's first nuclear weapons.
- Operations performed at the Joslyn Manufacturing Site included heating and machining uranium billets and converting them into metal rods for shipment to Hanford, Washington.
- In 2009, the U.S. Army Corps of Engineers added the Joslyn Manufacturing Site to the FUSRAP Program.

- The Corps project is to perform a comprehensive environmental investigation to assess the nature and extent of FUSRAP contamination, the associated human health and ecological risks, and identify and implement clean up actions as needed to address site hazards.
- The objective of FUSRAP is to remediate sites to a risk level commensurate with projected future use of the site.

**Importance**

- Elevated levels of radionuclides may exceed federal environmental protection requirements, criteria, and limitations.

**Consequences**

- Potential for long-term, adverse human health effects.
- Future site use may be limited due to contamination.

Project Phase	Estimated Federal Cost	Funding through FY21	FY22 Requirement	FY22 Budget	FY23 Requirement	FY23 Budget
Investigation*	\$13.9M	\$4.5M	\$600k	\$0	\$500k	\$400k

\*Investigation phase includes remedial investigation, feasibility study, proposed plan, and record of decision.

**Project Sponsor/Customer**

- Stakeholders include property owners (Valbruna Slater Stainless Inc.), affected communities and elected leaders, and local, state, and federal environmental and health agencies.

**Congressional Interests**

- Representative Jim Banks R-IN-3
- Senator Todd Young R-IN
- Senator Mike Braun R-IN

**Current Status**

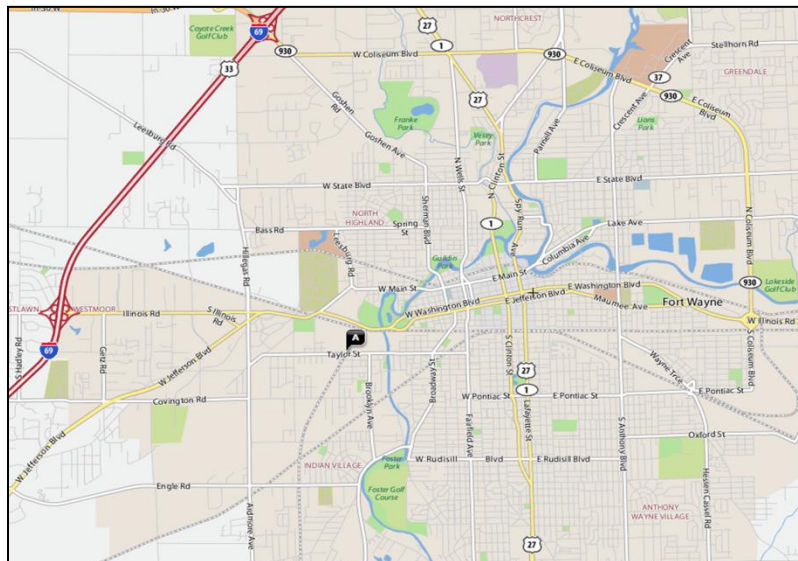

- The Buffalo District has completed the field investigation and is preparing the remedial investigation report. This report will identify the nature and extent of FUSRAP contamination and the associated human health and ecological risks.
- In FY22 Buffalo District will complete the report and start the internal document review process.
- In FY23 Buffalo District will publicly release the remedial investigation report. The results of this report will determine whether a feasibility study to evaluate cleanup alternatives is required

**Issues**

- None.
