## Pultneyville Harbor, NY

### Harbor Features

- Located on the south shore of Lake Ontario in the Town of Williamson, Wayne County, NY
- Authorization: Section 107 of the Rivers & Harbor Act of 1960
- Shallow draft recreational harbor
- Project depths are 8 feet in the entrance channel and 6 feet in the harbor basin.
- The harbor was initially protected by East and West Piers. Portions of the lakeward end of each pier were removed in 1933-1934 by USACE. The local community reconstructed approximately 300 feet of the landward end of the West Pier in 2021 with Section 408 permission from USACE.
- Other features include public transient slips and launching facilities.
- Major stakeholders: Pultneyville Yacht Club, private marinas, charter fishing interests, and the recreational boating community.

### Project Requirements

- The harbor requires frequent dredging to maintain the navigation channel.
- Repairs to deteriorated sections of the east and west piers are needed to ensure the entrance channel and shoreline are adequately protected. The east pier and a portion of the west pier are currently below water. The structures provide limited protection and create hazards for recreational boaters utilizing the harbor.
- Engineering and design of repairs to the west pier will be initiated in 2023.

### Consequences of Not Maintaining the Project

- Safety issues for recreational boating community and rescue vessels.
- Negative economic impacts, both locally and regionally

### Transportation Importance

- Located along Lake Ontario between Irondequoit Bay Harbor and Great Sodus Bay Harbor.
- Provides safe harbor for recreational vessels
