

**DEPARTMENT OF THE ARMY**  
BUFFALO DISTRICT, CORPS OF ENGINEERS  
1776 NIAGARA STREET  
BUFFALO, NEW YORK 14207-3199

**DEPARTMENT OF THE ARMY PERMIT**

Permittee: Jason A. Toth  
Lieutenant Colonel, Corps of Engineers  
District Commander  
On Behalf of the General Public

Regional Permit No.: 79-000-3  
Processing No.:  
Effective Date: February 11, 2019  
Expiration Date: February 10, 2024  
Affirmation Date:

Issuing Office: U.S. Army Engineer District, Buffalo  
1776 Niagara Street  
Buffalo, New York, 14207-3199

**IMPORTANT:**

**Prior to commencing the activity authorized by this permit or directing a contractor to perform such activity on your behalf, be sure that all parties read, understand and comply with the terms and conditions of this permit. Written affirmation on the applicability of this permit is required from the U.S. Army Corps of Engineers before work can commence.**

**Non-compliance with any of the terms or conditions of this permit may result in an order to remove the activity; civil and/or criminal penalties or both.**

AUTHORITIES: You have been authorized to undertake the activity described below pursuant to:

Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403)

and

Section 404 of the Clean Water Act (33 U.S.C. 1344)

AUTHORIZED ACTIVITY: Construct and maintain boathouses that have received written affirmation of permit applicability from the U.S. Army Engineer District, Buffalo.

LOCATION OF THE AUTHORIZED ACTIVITY: Waters of the United States that are located within the State of New York and subject to regulation by the U.S. Army Engineer District,

Buffalo.

The general public is hereby authorized by the Secretary of the Army to perform the work authorized by this permit provided the following general and special conditions are fully complied with.

The District Commander reserves the right to include any additional special conditions or require an individual permit as may be necessary to safeguard the public interest or protect important public resources on a case by case basis.

401 WATER QUALITY CERTIFICATION: The New York State Department of Environmental Conservation (NYSDEC) has granted Section 401 Water Quality Certification for this Regional Permit.

COASTAL ZONE MANAGEMENT CONSISTENCY DETERMINATION: The New York State Department of State (NYSDOS) concurs with the Corps' Coastal Zone Management consistency determination for this Regional Permit, except for the conditions identified below.

Individual consistency certification concurrence is required in the following instances:

- a. For any work that involves the use of blasting within the entire Coastal Zone Management (CZM) area;
- b. For any boathouse proposal that also includes a proposed dock, subject to authorization under another Regional Permit, this requirement is waived by the Department of State for proposed docks accessory to a boathouse if the total square footage of all boathouse and docks on the site is no greater than 1200 square feet;
- c. For all activities and structures located in New York State Significant Coastal Fish and Wildlife Habitat areas;
- d. For all activities and structures located within a federally approved Local Waterfront Revitalization Program;
- e. For all private recreational boathouses not accessory to a private residential upland use.

NOTE: When the property associated with the work authorized by this permit is sold or transferred, the terms and conditions of this permit will continue to be binding on the new owner(s) of the property. To validate the transfer of this permit and the liabilities associated with compliance with its terms and conditions, have the transferee sign and date on the last page of this permit and forward a copy of the permit to this office to validate the transfer of this authorization.

DEFINITIONS: The term "**you**" and its derivatives, as used in this permit, mean the permittee or any future transferee. The term "**this office**" refers to the Buffalo District Corps of Engineers Regulatory office having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer. The term "**activity**" as used in this permit includes all structures and work authorized by this permit.

**Barrier beach** - A low-lying, sandy island or spit, resulting from coastal sedimentation that lies along the shoreline and is generally parallel to, but separated from the mainland by an embayment, and often has dunes superimposed on it.

**Navigable waters (as regulated under Section 10 of the Rivers and Harbors Act)** - Those waters that are subject to the ebb and flow of the tide and/or are presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce. A determination of navigability, once made, applies laterally over the entire surface of the waterbody, and is not extinguished by later actions or events which impede or destroy navigable capacity. A list of navigable waters in the Buffalo District can be found on the Buffalo District web site at <http://www.lrb.usace.army.mil/Missions/Regulatory/DistrictInformation/NavigableWaterways>, or by calling (716) 879-4330.

**Ordinary High Water Mark** - The line on the shore established by the fluctuations of water as indicated by physical characteristics such as a clear, natural line impressed on the bank, shelving, changes in the character of the soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding areas.

Regulations at 33 CFR 322.5(d) *Structures for small boats*. (1) In the absence of overriding public interest, favorable consideration will generally be given to applications from riparian owners for permits for piers, boat docks, moorings, platforms and similar structures for small boats. Particular attention will be given to the location and general design of such structures to prevent possible obstructions to navigation with respect to both the public's use of the waterway and the neighboring proprietors' access to the waterway. Obstructions can result from both the existence of the structure, particularly in conjunction with other similar facilities in the immediate vicinity, and from its inability to withstand wave action or other forces which can be expected. District engineers will inform applicants of the hazards involved and encourage safety in location, design, and operation. District engineers will encourage cooperative or group use facilities in lieu of individual proprietary use facilities.

#### GENERAL PERMIT NOTIFICATION REQUIREMENTS:

Prior to commencement of work, a Department of the Army permit application must be submitted to the Buffalo District for written affirmation of the applicability of this permit. The following information must be submitted with the New York State Department of Environmental Conservation / U.S. Army Corps of Engineers joint application for permit:

1. Name, address and telephone number of the applicant.
2. Location map identifying project site.
3. A brief project description.
4. Project plans depicting proposed work.
5. Location map and description of temporary and permanent disposal sites.

GENERAL CONDITIONS:

1. The installation of the permitted structure and fills authorized under this regional permit must be completed prior to the expiration date noted on the first page of this authorization. In the event that the affirmation date is less than twelve months prior to the expiration date, the regional permit will remain valid for a period of twelve months from the affirmation date. In no case shall authorization exceed twelve months beyond the expiration date.
2. You must maintain the structure and fills authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted structure and/or fills, unless you make a good faith transfer to a third party in accordance with requirements noted below. Should you wish to cease to maintain the authorized structure and/or fill or should you desire to abandon it without a good faith transfer, you may be required to remove the structure(s) and/or fill(s) and restore the site to its original pre-project conditions.
3. If you discover any previously unknown historic or archaeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and State coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.
4. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.
5. The permittee understands and agrees that, if future operations by the United States require the removal, relocation, or other alteration, of the structure or work herein authorized, or if, in the opinion of the Secretary of the Army or his authorized representative, said structure or work shall cause unreasonable obstruction to the free navigation of the navigable waters, the permittee will be required, upon due notice from the Corps of Engineers, to remove, relocate, or alter the structural work or obstructions caused thereby, without expense to the United States. No claim shall be made against the United States on account of any such removal or alteration.
6. This office reserves the right to use this regional permit in combination with any existing or future nationwide, regional or individual permit or any letter of permission.

SPECIAL CONDITIONS:

1. The boathouse must meet the following dimensions:
  - a. The maximum height of the boathouse does not exceed 16 feet as measured from the ordinary high water (OHW) mark to the top of the structure.
  - b. The surface area of the boathouse must not exceed 1000 square feet, and the 1000

square feet must include all associated interior and perimeter docks.

- c. Boathouses that contain more than two bays for docking are not permitted under this permit.
  - d. Access docks from the OHW to the boathouse are authorized under this permit provided they are no more than 20 feet long by 4 feet wide. Docks exceeding this or extending waterward of the boathouse structure will need separate authorization (such as Regional Permits 86-000-1, 87-000-1 or Individual Permit). *(See **Agency Coordination** for additional requirements for any boathouse proposal that also includes a proposed dock, subject to authorization under another Regional Permit)*
  - e. Interior and perimeter walkways or docks must not exceed 8 foot in width.
2. The authorized structure and/or fill must not interfere with the public's right to free navigation on all navigable waters of the United States (see 33 CFR 322.5(d)).
  3. The permittee is responsible for ensuring that the contractor and/or workers executing the activity(s) authorized by this permit have knowledge of the terms and conditions of the authorization and that a copy of the permit document is at the project site throughout the period the work is underway.
  4. Unless otherwise exempted by Federal and/or State law, the use of creosote treated wood is prohibited in New York State. All treated wood must be aged in the open air for at least three months prior to in-water use. Wood must be clean and free of surface deposits. Timber with surface deposits must be washed for at least five minutes under running water prior to use. Any wood debris, such as sawdust or wash water, must not enter any regulated waters. This washing must occur more than 100 feet from regulated waters. The use of wood treated with Pentachlorophenol is prohibited to come in contact with marine or brackish waters. For more information, contact the applicable NYSDEC regional office and the U.S. Environmental Protection Agency regional office.
  5. The support must consist of pilings or stone filled timber cribs. The pilings shall be wood, steel, or other structurally sound inert material. Where practicable, wood and steel pilings should be used in lieu of timber cribs or concrete columns. This permit does not authorize solid concrete foundations.
  6. Boathouses to be constructed along the shoreline shall have the most shoreward support or footer either above the Ordinary High Water (OHW) shoreline or 10 feet waterward of the OHW elevation. A variance to this condition is allowed if more than 50 percent of the entire boathouse structure is located upland and the crib sizes comply with Special Conditions 7 and 8.
  7. The total length of all crib supports must not exceed 50 percent of the total length of each boathouse. The length of individual cribs must not exceed 8 feet. The overall size of the individual cribs may vary but must not exceed 32 square feet.

8. If used, the sides of timber cribs shall not be sealed and must have openings amounting to at least 40 percent of the peripheral area of the crib. The fill placed in the cribs shall be clean stone large enough so as not to pass through the crib openings.
9. If the construction of pilings involves the use of poured concrete, the placement shall be performed using tightly sealed forms to prevent the material from entering the waterway. The forms shall be dewatered prior to the pouring of concrete. Each individual concrete structural member shall not exceed a maximum of 12 inches in diameter and shall be spaced a minimum of 6 feet apart.
10. Any interior and perimeter walkways or docks must be a minimum of one foot above the Ordinary High Water elevation.
11. Side staving, if used, shall not extend lower than half the distance between Ordinary High and Low Water levels.
12. All in-water work shall be restricted to dates that will preclude the adverse impacts to indigenous fish species. The applicant is required to obtain these dates from the appropriate NYSDEC regional office.
13. If necessary, dredging below the Ordinary High Water elevation, for support placement, shall be limited to 15 cubic yards. Dredged stone that meets the criteria specified in Special Condition 8 may be used in the cribs. All other dredged material must be deposited on upland property and stabilized to prevent reentry into waters of the United States, including wetlands.
14. The boathouse and associated interior and perimeter walkways and attached docks must be set back a minimum of 10 feet from the common property line of adjoining properties that are under separate ownership. The setback is measured at the point where the common boundary terminates at the Ordinary High Water shoreline.
15. This permit does not authorize work on barrier beaches when it is determined by the District Engineer that the work would adversely impact a barrier beach.
16. This permit does not authorize work in areas designated by New York State as erosion hazard areas, unless a permit is obtained under the New York Coastal Erosion Hazard Area Act (Article 34 of the Environmental Conservation Law). Permits are administered by either the New York State Department of Environmental Conservation (NYSDEC), municipality, or county.
17. This permit does not authorize the construction of boathouses:
  - a. For non-water dependent uses;
  - b. Which include a second story;

- c. Which include a living quarters or sanitary facilities;
- d. Where one already exists on the site unless the existing boathouse is being removed and replaced with a new one.

18. In order to provide for the protection of water quality, the work area shall be isolated during construction for the following circumstances:

- a. **Blasting:** Bubble curtains shall be used when blasting, to mitigate blasting shock waves.
- b. **Installation of crib structures:** The use of siltation curtains or similar protective measures shall be placed surrounding the work area, and kept in place and maintained until turbidity has settled.
- c. While driving piles for boathouse supports, no isolation of the work area is necessary, unless other circumstances warrant.

19. **Endangered Species:** The application must include a written statement indicating if any federally listed species or designated critical habitat might be affected or is in the vicinity of the project, or if the project is located in designated critical habitat, for activities that are proposed to occur within sensitive areas, as identified on the attached list (Table 1). For activities that are proposed to occur within these sensitive areas, the application must include a discussion of potential threatened and endangered species (T&E) habitat within the project site. Refer to the USFWS T&E website at <https://www.fws.gov/northeast/nyfo/es/NYSpecies.htm> for information on habitat requirements for listed species. If there is potential habitat for any federally listed species within the project site:

- a. Send the results of any habitat surveys
- b. Include a detailed description of the proposed project, including approximate proposed project construction schedule and project activities (e.g., land clearing, utilities, stormwater management).
- c. Include a description of the natural characteristics of the property and surrounding area (e.g., forested areas, freshwater wetlands, open waters, and soils). Additionally, please include a description of surrounding land use (residential, agricultural, or commercial).
- d. Provide a description of the area to be impacted by the proposed project, including trees to be removed.
- e. Provide a description of conservation measures to avoid or minimize impacts to listed species. Appropriate conservation measures can be found: <https://www.fws.gov/northeast/nyfo/es/NYSpecies.htm>
- f. Provide photos of the site
- g. If tree clearing will take place, provide a map outlining the tree removal area and indicate the amount of trees to be cleared

**Work in the townships, watersheds, or locations identified on Table 1 shall not commence** under this permit until the requirements of the Endangered Species Act have been satisfied and the applicant receives written verification that the work may proceed from this office. Note that

as a result of consultation with the USFWS, the District Engineer may add species-specific conditions to the permit.

20. **National Wild and Scenic Rivers (NWSR) System:** The application must include a written statement indicating if the activity is located within a component of the National Wild and Scenic Rivers (NWSR) System, or on rivers currently being studied at the direction of Congress as potential additions to the NWSR System, or rivers for which Wild and Scenic Rivers studies have been completed and forwarded to Congress and which Congress is still considering. The portion of the Genesee River located within Letchworth Gorge State Park, beginning at the southern boundary of the park and extending downstream to the Mt. Morris Dam, was designated by Congress as a permanent Study River in the Genesee River Protection Act of 1989. No activity may occur within a NWSR, including Study Rivers, unless the National Park Service (NPS) has determined in writing that the proposed work will not adversely affect the NWSR designation or study status. In addition, the application must include a statement indicating if the activity is located within areas listed in the Nationwide Rivers Inventory (list is available at: <http://www.nps.gov/ncrc/programs/rtca/nri/states/ny.html>). Activities located in the above areas will be evaluated on a case by case basis, which will include coordination with the National Park Service.

21. **Cultural Resources:** The application must include a written statement indicating if the proposed activity may have the potential to cause effects to any historic properties listed, determined to be eligible for listing on, or potentially eligible for listing on the National Register of Historic Places, including previously unidentified properties. In order for the Buffalo District to determine if National Historic Preservation Act Section 106 consultation is required, the application must include a written statement indicating if any properties listed or eligible for listing, in the National Register of Historic Places may be affected by the proposed project. A copy of any completed survey reports shall be provided with the application. If a survey has not been performed then the statement shall include a list of resources checked in the determination. Copies of any available correspondence from NYS Office of Parks, Recreation, and Historic Preservation (SHPO) regarding historic properties shall be provided with the application. Information regarding cultural resources may be found at: <http://parks.ny.gov/shpo/>. Assistance regarding information on the location of or potential for the presence of historic resources can be sought from the State Historic Preservation Officer or Tribal Historic Preservation Officer (THPO), as appropriate, and the National Register of Historic Places (see 33 CFR 330.4(g)). Based on the information submitted and these efforts, the district engineer shall determine whether the proposed activity has the potential to cause an effect on the historic properties. Where the applicant has identified historic properties which the activity may have the potential to cause effects and so notified the Corps, the applicant shall not begin the activity until notified by the district engineer either that the activity has no potential to cause effects or that consultation under Section 106 of the NHPA has been completed. Prospective permittees should be aware that section 110k of the NHPA (16 U.S.C. 470h-2(k)) prevents the Corps from granting a permit or other assistance to an applicant who, with intent to avoid the requirements of Section 106 of the NHPA, has intentionally significantly adversely affected a historic property to which the

permit would relate, or having legal power to prevent it, allowed such significant adverse effect to occur, unless the Corps, after consultation with the Advisory Council on Historic Preservation (ACHP), determines that circumstances justify granting such assistance despite the adverse effect created or permitted by the applicant. If circumstances justify granting the assistance, the Corps is required to notify the ACHP and provide documentation specifying the circumstances, explaining the degree of damage to the integrity of any historic properties affected, and proposed mitigation. This documentation must include any views obtained from the applicant, SHPO/THPO, appropriate Indian tribes if the undertaking occurs on or affects historic properties on tribal lands or affects properties of interest to those tribes, and other parties known to have a legitimate interest in the impacts to the permitted activity on historic properties.

22. The District Commander reserves the right to include any additional special conditions.

#### AGENCY COORDINATION REQUIREMENTS:

1. You must furnish the New York State Department of State (NYS DOS) a copy of your application for federal agency authorization (e.g. a Joint U.S. Army Corps of Engineers & NYS Department of Environmental Conservation permit application), a signed copy of the Federal Consistency Assessment Form (FCAF) and policy analysis (available at: [http://www.dos.ny.gov/opd/programs/pdfs/Consistency/FCAF\\_fillable.pdf](http://www.dos.ny.gov/opd/programs/pdfs/Consistency/FCAF_fillable.pdf)), project drawings, recent color photographs, and all supporting information as described in D.2 of the FCAF for the following activities occurring within or affecting the coastal area:
  - a. For any work that involves the use of blasting within the entire Coastal Zone Management (CZM) area;
  - b. For any boathouse proposal that also includes a proposed dock, subject to authorization under another Regional Permit, this requirement is waived by the Department of State for proposed docks accessory to a boathouse if the total square footage of all boathouse and docks on the site is no greater than 1200 square feet;
  - c. For all activities and structures located in New York State Significant Coastal Fish and Wildlife Habitat areas;
  - d. For all activities and structures located within a federally approved Local Waterfront Revitalization Program;
  - e. For all private recreational boathouses not accessory to a private residential upland use.

Electronic submissions can be made by e-mailing all of the above mentioned information to NYS DOS at: CR@dos.state.ny.us. Hard copies of submissions should be forwarded to:

NYS Department of State  
Office of Planning and Development  
Consistency Review Unit  
One Commerce Plaza  
99 Washington Ave.

Albany, NY 12231-0001  
Telephone (518) 474-6000

In addition, you must furnish the District Engineer, Buffalo District, with a copy of the consistency concurrence letter or a dated copy of the Federal Consistency Assessment Form that you provided to the NYS DOS.

2. Prior to or immediately following construction of the dock(s) authorized by this permit you shall contact the U.S. Coast Guard to determine if any safety lights or signals are required. If directed by the U.S. Coast Guard, you shall install and maintain these devices at your expense. Information concerning the approval process may be obtained by calling (216) 902-6074 or by writing to:

Commander (OAN)  
Ninth Coast Guard District  
ATTN: Private Aids to Navigation  
1240 East Ninth Street  
Cleveland, Ohio 44199-2060

EXCLUSIONS:

This permit does not apply to:

1. Cases where the District Engineer determines that the activity may affect properties listed, or eligible for listing, in the National Register of Historic Places, the activity is not authorized, until the requirements of Section 106 of the National Historic Preservation Act (NHPA) have been satisfied.
2. Any other areas named in Acts of Congress or Presidential Proclamations as National Wilderness Areas, National Recreational Areas, Lakeshores, Parks, Monuments and such areas as may be established under Federal Law for similar and related purposes, such as estuaries and marine sanctuaries, except where specifically authorized by this regional permit.
3. Any freshwater wetland as defined in Department of the Army permit regulations at Title 33 of the Code of Federal Regulations, Parts 320 et. seq. except that boathouses may be constructed at the waterward edge of such wetlands provided that access to the boathouse through the wetland is in the form of an open pile supported pedestrian walkway and that no dredging of adjacent wetlands will be required. The access walkway shall not exceed 4 feet in width and shall be a minimum of 3 feet above the surface of the substrate.
4. Any other special aquatic sites as defined in the U.S. Environmental Protection Agency Guidelines for Specification of Disposal Sites for Dredged or Fill Material at Title 40 of the Code of Federal Regulations, Part 230 when the specific site area is a vegetated shallow, pool and riffle complex area or mud flat area that the State has specifically designated as an important fish spawning or nursery area or significant fish and wildlife habitat, or is designated as such in the

future, or the District Commander has determined to be an ecologically sensitive site.

5. Activities which may jeopardize the continued existence of species listed as endangered or threatened under the Endangered Species Act (ESA) of 1973, as amended, or result in the likelihood of the destruction or adverse modification of a habitat which is determined by the Secretary of the Interior or Commerce, as appropriate, to be a critical habitat under the Endangered Species Act of 1973, as amended. No activity is authorized under this Regional Permit which is likely to directly or indirectly jeopardize the continued existence of a threatened or endangered species or a species proposed for such designation, as identified under the Federal Endangered Species Act (ESA), or which will directly or indirectly destroy or adversely modify the critical habitat of such species. No activity is authorized under this Regional Permit which "may affect" a listed species or critical habitat, unless Section 7 consultation addressing the effects of the proposed activity has been completed. Authorization of an activity by this Regional Permit does not authorize the "take" of a threatened or endangered species as defined under the ESA. In the absence of separate authorization (e.g., an ESA Section 10 Permit, a Biological Opinion with "incidental take" provisions, etc.) from the U.S. FWS or the NMFS, The Endangered Species Act prohibits any person subject to the jurisdiction of the United States to take a listed species, where "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. The word "harm" in the definition of "take" means an act which actually kills or injures wildlife. Such an act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding or sheltering.

Note: Limitations in items 2 through 5 above do not apply to any authorized activity when the work is for the benefit and uses of the site and is specifically endorsed, in writing, by the responsible Federal and State government officials such as the State Historic Preservation Officer, Refuge Manager, Regional Directors of U.S. Department of the Interior Offices such as the National Park Service and the U.S. Fish and Wildlife Service, etc.

7. Structures which may contribute to or affect flooding or restrict the flow of any tributary stream or watercourse are not authorized under this General Permit.

#### LIMITS OF THIS AUTHORIZATION

1. The granting of this permit does not obviate the need to obtain other Federal, State or local authorizations as required by law. Specifically, a permit pursuant to the Environmental Conservation Law Articles 15, 24 or 34 may be required from the New York State Department of Environmental Conservation.

2. Issuance of this permit does not grant you any property rights or exclusive privileges, nor does it authorize any injury to the property or rights of others.

3. This permit does not authorize interference with any existing or proposed Federal project,

nor does it convey any authority to interfere with the right of the public to free navigation on all navigable waters of the United States.

**LIMITS OF FEDERAL LIABILITY:** In issuing this permit, the Federal Government does not assume any liability for the following:

1. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
2. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.
3. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.
4. Design or construction deficiencies associated with the permitted work.
5. Damages associated with any future modification, suspension, or revocation of this permit.

**RELIANCE ON APPLICANT'S DATA:** The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

**RE-EVALUATION OF THE DECISION TO GRANT A REGIONAL PERMIT:** This office may re-evaluate its decision on this permit at any time circumstances warrant. Circumstances that could require a re-evaluation include, but are not limited to, the following:

1. You fail to comply with the terms and conditions of this permit.
2. The information provided by you in support of your application proves to have been false, incomplete, or inaccurate.
3. Significant information surfaces which this office did not consider in reaching the original public interest decision.

Such a re-evaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in Title 33 of the Code of Federal Regulations Part 325.7 or enforcement procedures such as those contained in Title 33 of the Code of Federal Regulations Parts 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you to comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive,

this office may, in certain situations (such as those specified in Title 33 of the Code of Federal Regulations Part 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

EXTENSIONS: General Condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a re-evaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit. Extension requests must be submitted in accordance with the directions given in General Condition 1.

BY AUTHORITY OF THE SECRETARY OF THE ARMY:

---

Jason A. Toth  
Lieutenant Colonel, Corps of Engineers  
District Commander

---

Date

When the property associated with the work authorized by this permit is sold or transferred, the terms and conditions of this permit will continue to be binding on the new owner(s) of the property. To validate the transfer of this permit and the liabilities associated with compliance with its terms and conditions, have the transferee sign and date below.

<sup>1</sup> Avoidance Action Codes:

- 1) The Corps will coordinate with the USFWS per the Standard Local Operating Procedures for Endangered Species.
- 2) The Corps will coordinate with the USFWS per the Standard Local Operating Procedures for Endangered Species for any project that includes tree removal (trees 3 inches in diameter or larger). If tree removal occurs within urban areas, Pre-construction Notification is NOT required. If no tree removal is proposed, Pre-construction notification is NOT required for these locations.

# NYSDEC Regions within the Buffalo District of the U.S. Army Corps of Engineers
